

Integrated Energy Monitoring & Optimization Solution

Integrated Energy Monitoring & Optimization Solution helps in bringing uniformity in the forecasting, scheduling, accounting, and commercial settlement procedures at the intra-state level, which is imperative for the smooth integration of renewable energy into the grid, besides promoting competition and the electricity market at the intra-state level.

KEY FEATURES

ABT Scheduling

Open Access Management

Transmission Outage
Management

Energy Accounting Management

Website & Mobile Application
Module

MIS Reporting Module

Settlement System Module
(Deviation, Reactive, & Congestion)

Data Migration & Integration
Module

Payment Accounting
(Bill Verification) Module

Master Data Management,
Data Archival & Retrieval Module

Demand Forecasting &
Renewable Forecasting Module
